

## ODMHA, DISTRICT III

### Allergy Policy

It is the responsibility of the team trainer to obtain a Medical Form for each player and it is the parents' responsibility to disclose any allergies. If a team identifies that a player or volunteer has an allergy (i.e. Peanuts, etc.), the team trainer and other team officials are responsible to engage the team in preventive and responsive measures to properly manage any potential incidents resulting from exposure to the allergen.

**Parents and players in a team where someone has been identified to have such an allergy (peanut or otherwise) must adhere to any directives issued by team or the local Minor Hockey Association representatives. Such directives shall be given to all players and parents of the team in writing – this shall constitute a written warning to all players and parents. Players and parents who do not adhere to such directives will be suspended for each incident of failing to adhere to such directives. Repeated offences may result in suspension for the season.**
